

Valentine's Day

Woven Watercolored Heart Goodie Bag

1. Print out the template on printer paper and cut out template.
2. Fold a 9x12 piece of watercolor paper in half.
3. Trace template two times onto watercolor paper, aligning the fold line on the watercolor paper with the dotted fold line on the template.
4. Watercolor the whole page! You can use wet-on-wet if you want the finished page to be a fun surprise. Wet the whole page with a spray bottle or brush, then drop different colors of paint all over. Splatter colors by flicking your loaded brush onto the paper. You can also use salt to create fun textures!
5. When the paper is dry (a hairdryer can speed up the process if you're impatient), refold the paper and cut around the outside of the template.
6. Cut the slits, making sure to cut them all the way to the end! (Even a little beyond is fine!)
7. Weave one finger on at a time, alternating the pattern with each finger.
8. Create the holes for the handle by punching through just one paper on the top left side of the heart, and then flipping the woven heart over and punching a second hole again on the top left side of the heart.
9. Put a cute yarn/rope through each hole and tie a knot to keep it from coming out.
10. Fill with anything...as long as it's chocolate...and give to someone you love!
